1/2"(13mm) Spade Handle Drill
Perceuse de 13 mm (1/2 po) à poignée-bêche
Taladro 13 mm (1/2")Mango tipo espada

DEWALT Industrial Tool Co., 701 East Joppa Road, Baltimore, MD 21286
Printed in U.S.A. (JUL02-CD-1) Form No. 384162-02 DW130,DW130-220 Copyright © 2002

The following are trademarks for one or more DeWALT power tools: the yellow and black color scheme; the "D" shaped air intake grill; the array of pyramids on the handgrip; the kit box configuration; and the array of lozenge-shaped humps on the surface of the tool.

Important Safety Instructions

WARNING: When using electric tools, basic safety precautions should always be followed to reduce risk of fire, electric shock, and personal injury, including the following:

READ ALL INSTRUCTIONS

Safety Instructions For All Tools

- **KEEP WORK AREA CLEAN.** Cluttered areas and benches invite injuries.
- **CONSIDER WORK AREA ENVIRONMENT.** Don't expose power tools to rain. Don't use power tools in damp or wet locations. Keep work area well lit. Do not use tool in presence of flammable liquids or gases.
- **GUARD AGAINST ELECTRIC SHOCK.** Prevent body contact with grounded surfaces. For example; pipes, radiators, ranges, and refrigerator enclosures.
- **KEEP CHILDREN AWAY.** Do not let visitors contact tool or extension cord. All visitors should be kept away from work area.
- **STORE IDLE TOOLS.** When not in use, tools should be stored in dry, and high or locked-up place — out of reach of children.
- **DON'T FORCE TOOL.** It will do the job better and safer at the rate for which it was intended.
- **USE RIGHT TOOL.** Don't force small tool or attachment to do the job of a heavy-duty tool. Don't use tool for purpose not intended.
- **DRESS PROPERLY.** Do not wear loose clothing or jewelry. They can be caught in moving parts. Non-skid footwear is recommended when working outdoors. Wear protective hair covering to contain long hair. Air vents often cover moving parts and should also be avoided.
- **USE SAFETY GLASSES.** Also use face or dust mask if operation is dusty.
- **DON'T ABUSE CORD.** Never carry tool by cord or yank it to disconnect from receptacle. Keep cord from heat, oil, and sharp edges.
- **SECURE WORK.** Use clamps or a vise to hold work. It's safer than using your hand and it frees both hands to operate tool.
- **DON'T OVERREACH.** Keep proper footing and balance at all times.
- **MAINTAIN TOOLS WITH CARE.** Keep tools sharp and clean for better and safer performance. Follow instructions for lubricating and changing accessories. Inspect tool cords periodically and if damaged, have repaired by authorized service facility. Inspect extension cords periodically and replace if damaged. Keep handles dry, clean, and free from oil and grease.
- **DISCONNECT OR LOCK OFF TOOLS** when not in use, before servicing, and when changing accessories, such as blades, bits, cutters.
- **REMOVE ADJUSTING KEYS AND WRENCHES.** Form habit of checking to see that keys and adjusting wrenches are removed from tool before turning it on.
- **AVOID UNINTENTIONAL STARTING.** Don't carry tool with finger on switch. Be sure switch is off when plugging in.
- **EXTENSION CORDS.** Use only 3-wire extension cords that have 3-prong grounding-type plugs and 3-pole receptacles that accept the tool's plug. Replace or repair damaged cords. Make sure your extension cord is in good condition. When using an extension cord, be sure to use one heavy enough to carry the current your product will draw. An undersized cord will cause a drop in line voltage resulting in loss of power and overheating. The following table shows the correct size to use depending on cord length and nameplate ampere rating. If in doubt, use the next heavier gage. The smaller the gage number, the heavier the cord.

Recommended Minimum Wire Size for Extension Cords

| Total Length of Cord | 50 ft. | 75 ft. | 100 ft. | 125 ft. | 150 ft. | 175 ft. |
|----------------------|------------------|------------------|-------------------|-------------------|-------------------|-------------------|
| 25 ft. 7.6 m | 50 ft. 15.2 m | 75 ft. 22.9 m | 100 ft. 30.5 m | 125 ft. 38.1 m | 150 ft. 45.7 m | 175 ft. 53.3 m |

| Wire Size | 18 AWG | 18 AWG | 16 AWG | 16 AWG | 14 AWG | 14 AWG | 12 AWG |
|-----------|--------|--------|--------|--------|--------|--------|--------|
| | | | | | | | |

- **OUTDOOR USE EXTENSION CORDS.** When tool is used outdoors, use only extension cords intended for use outdoors and so marked.
- **STAY ALERT.** Watch what you are doing. Use common sense. Do not operate tool when you are tired.
- **CHECK DAMAGED PARTS.** Before further use of the tool, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced by an authorized service center unless otherwise indicated elsewhere in this instruction manual. Have defective switches replaced by authorized service center. Do not use tool if switch does not turn it on and off.
- **CAUTION:** When drilling or driving into walls, floors or wherever live electrical wires may be encountered, DO NOT TOUCH ANY METAL PARTS OF THE TOOL! Hold the tool only by insulated grasping surfaces to prevent electric shock if you drill or drive into a live wire.

Additional Safety Instructions

WARNING: Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- lead from lead-based paints,
- crystalline silica from bricks and cement and other masonry products, and
- arsenic and chromium from chemically-treated lumber (CCA).

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

- **Avoid prolonged contact with dust from power sanding, sawing, grinding, drilling, and other construction activities.** Wear protective clothing and wash exposed areas with soap and water. Allowing dust to get into your mouth, eyes, or lay on the skin may promote absorption of harmful chemicals.

CAUTION: Wear appropriate hearing protection during use. Under some conditions and duration of use, noise from this product may contribute to hearing loss.

- The label on your tool may include the following symbols.

| | | | |
|-----|-----------------------|---------|------------------------|
| V | volts | A | amperes |
| Hz | hertz | W | watts |
| min | minutes | ~ | alternating current |
| --- | direct current | no | no load speed |
| □ | Class II Construction | ⊕ | earthing terminal |
| △ | safety alert symbol | .../min | revolutions per minute |

Double Insulation

Double insulated tools are constructed throughout with two separate layers of electrical insulation or one double thickness of insulation between you and the tool's electrical system. Tools built with this insulation system are not intended to be grounded. As a result, your tool is equipped with a two prong plug which permits you to use extension cords without concern for maintaining a ground connection.

NOTE: Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.

CAUTION: WHEN SERVICING USE ONLY IDENTICAL REPLACEMENT PARTS. Repair or replace damaged cords.

Polarized Plugs

Polarized plugs (one blade is wider than the other) are used on equipment to reduce the risk of electric shock. When provided, this plug will fit in the polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

SAVE THESE INSTRUCTIONS

Motor

Your DeWALT tool is powered by a DeWALT built motor. Be sure your power supply agrees with the nameplate marking. The markings; 120, 220 volts, 50/60 Hz or "AC/DC", mean that your drill will operate on alternating or direct current. Voltage decrease of more than 10% will cause loss of power and overheating. All DeWALT tools are factory tested; if this tool does not operate, check the power supply.

Spade Handle Assembly: (Fig. 1)

This spade handle can be attached either horizontally or vertically. Place the handle into the locating boss on the back of the drill and assemble with holding knob.

Side Handle (Fig. 1)

The side handle can be placed in either side of the drill or the top of the drill according to operator preference and available working clearance. The spade handle can be temporarily removed if working clearance at rear of tool is limited. Always replace spade handle when possible.

CAUTION: Always use the side handle and switch handle. This is a high-torque drill. Always hold it firmly with both hands when operating.

Switch: (Fig. 2)

Pressing the TOP part of the switch runs the tool in a reverse direction (A). Pressing the BOTTOM part of the switch runs the tool in a forward direction (B). Always let the motor stop completely before changing direction.

To lock trigger in "FORWARD" position, depress LOWER part of trigger and push up lock button (C). Then, while holding lock button in position, gently release trigger. To release locking mechanism, depress trigger fully, then release it.

NOTE: Locking mechanism will not function if upper part of trigger is depressed (reverse operation).

The locking feature is for use when the drill is mounted in a drill stand or otherwise firmly held...NOT BY HAND.

Do not lock the switch "ON" when drilling by hand so that you can instantly release the trigger switch if the bit binds in the hole.

Be sure to release the switch locking button before disconnecting the plug from the power supply. Failure to do so will cause the tool to start immediately the next time it is plugged in. Damage or injury could result.

Operate, check the power supply.

Chuck

To insert bit, open chuck jaws by turning collar with fingers and insert shank of bit about 3/4" (19mm) into chuck. Tighten chuck collar by hand. Place chuck key in each of the three holes and tighten in clockwise direction. It's important to tighten chuck with all three holes. To release bit, turn chuck key counterclockwise in just one hole, then loosen the chuck by hand.

Chuck Removal (Figures 3 & 4)

1. Place chuck key in chuck as shown in Figure 3. Using a wooden mallet or similar object, strike key sharply in a CLOCKWISE direction. This will loosen screw inside chuck.
2. Open chuck jaws fully. Insert screwdriver into front of chuck between jaws to engage screw head. Remove screw by turning clockwise (left-hand thread).
3. Place key in chuck as shown in Figure 4. Using a wooden mallet or similar object, strike key sharply in a COUNTERCLOCKWISE direction. This will loosen chuck so that it can be unscrewed by hand.

Para evitar que las brocas se sobrecalienten, deben sacarse frecuentemente del barreno para quitar las virutas acumuladas en las estrías. Para hacer perforaciones más grandes, emplee brocas de poder para madera. El material que podría astillarse debe protegerse con un respaldo de madera.

Taladrado en metal

Utilice un lubricante para corte cuando perfure metales, excepto en los casos de hierro colado o latón en los que se deberá taladrar en seco. Los lubricantes más adecuados para corte son los de aceite sulfúrico y la manteca de cerdo.

Taladrado en mampostería

Utilice brocas con punta de carburo de tungsteno a bajas velocidades. Conserva uniforme la presión sobre el taladro, pero no al grado que se despostilen los materiales. La salida continua de volutas de polvo indica que se está aplicando la velocidad apropiada.

Lubricación

Todos los baleros de bolas y agujas empleados en esta herramienta se lubrifican para toda su vida útil. Todos los baleros de agujas reciben lubricación de la grasa en la caja de engranes. Limpie y relubrique la caja de engranes anualmente o cuando sea que el servicio requiera sacar la caja de engranes. Utilice el tipo y la cantidad de grasa indicados en la lista de partes que viene empacada con su herramienta.

La caja de engranes se saca quitando los tres tornillos de la parte frontal de la herramienta. Si el portabrocas es demasiado grande para permitir quitar los dos tornillos de la parte superior, vea las instrucciones de remoción del portabrocas.

Carbones del motor

APAGUE Y DESCONECTE EL TALADRO DE LA TOMA DE CORRIENTE.

Para revisar los carbones, destornille las tapas de plástico de inspección de los carbones (localizadas a los lados de la carcasa del motor) y el muelle y el montaje de los carbones podrán sacarse de la herramienta. Conserva limpios los carbones y deslizándose libremente sobre sus guías. Los carbones tienen varios símbolos estampados. Si el carbón se desgastó hasta el punto en que estos símbolos no se vean, deberá reemplazarse. Los centros de servicio autorizados DeWALT tienen montajes de carbones nuevos a su disposición.

Accesorios

Dispone usted de los accesorios para su herramienta por un cargo adicional con su distribuidor local autorizado. Se incluye una lista completa de los centros de servicio con su herramienta. Si necesita ayuda para encontrar cualquier accesorio, por favor comuníquese con DeWALT Industrial Tool Co., 701 East Joppa Road, Baltimore, MD 21286 o llame al teléfono 1-800-732-4441.

CAPACIDADES MAXIMAS RECOMENDADAS

Capacidad del taladro

| 12,7 mm R.P.M. | 13mm 0-450 | 1/2" 0-1000 | 13mm | 1/2" |
|------------------------|---------------|----------------|---------|--------|
| Brocas para metal | 12,7 mm | 1/2" | 12,7 mm | 1/2" |
| Brocas de poder | 38,1 mm | 1 1/2" | 38,1 mm | 1 1/2" |
| Alimentación | 76,2 mm | 3" | 44,4 mm | 1 3/4 |
| Espada | 38,1 mm | 1 1/2" | 38,1 mm | 1 1/2" |
| Brocas sierra p/madera | 127 mm | 5" | 76,2 mm | 3" |
| Brocas sierra p/metal | 101,6 | 4" | 38,1 mm | 1 1/2" |

EL ACCESORIO DEBE ESTAR CLASIFICADO PARA UTILIZARSE A UNA VELOCIDAD IGUAL O MAYOR QUE LAS R.P.M. SEÑALADAS EN LA PLACA DE IDENTIFICACION DE LA HERRAMIENTA QUE SE ESTÉ EMPLEANDO.

Importante

Para garantizar la SEGURIDAD y la CONFIABILIDAD, deberán hacerse reparaciones, mantenimiento y ajustes de esta herramienta en los centros certificados de servicio u otras organizaciones autorizadas que empleen siempre refacciones legítimas DeWALT.

Póliza de Garantía

IDENTIFICACIÓN DEL PRODUCTO:

Sello o firma del Distribuidor.

Nombre del producto: _____ Mod./Cat.: _____

Marca: _____ Núm. de serie: _____

(Datos para ser llenados por el distribuidor)

Fecha de compra y/o entrega del producto: _____

Nombre y domicilio del distribuidor donde se adquirió el producto:

Este producto está garantizado por un año a partir de la fecha de entrega, contra cualquier defecto en su funcionamiento, así como en materiales y mano de obra empleados para su fabricación. Nuestra garantía incluye la reparación o reposición del producto y/o componentes sin cargo alguno para el cliente, incluyendo mano de obra, así como los gastos de transportación razonablemente erogados derivados del cumplimiento de este certificado.

Para hacer efectiva esta garantía deberá presentar su herramienta y esta póliza sellada por el establecimiento comercial donde se adquirió el producto, de no contar con ésta, bastará la factura de compra.

EXCEPCIONES.

Esta garantía no será válida en los siguientes casos:

- Cuando el producto se hubiese utilizado en condiciones distintas a las normales;
- Cuando el producto no hubiese sido operado de acuerdo con el instructivo de uso que se acompaña;
- Cuando el producto hubiese sido alterado o reparado por personas distintas a las enlistadas al final de este certificado.

Anexo encontrará una relación de sucursales de servicio de fábrica, centros de servicio autorizados y franquiciados en la República Mexicana, donde podrá hacer efectiva su garantía y adquirir partes, refacciones y accesorios originales.

Garantía Completa

Las herramientas industriales DeWALT están garantizadas durante un año a partir de la fecha de compra. Repararemos, sin cargos, cualquier falla debida a material o mano de obra defectuosos. Por favor regrese la unidad completa, con el transporte pagado, a cualquier Centro de Servicio para Herramientas Industriales de DeWALT o a las estaciones de servicio autorizado enlistadas bajo "Herramientas Eléctricas" en la Sección Amarilla. Esta garantía no se aplica a los accesorios ni a daños causados por reparaciones efectuadas por terceras personas. Esta garantía le otorga derechos legales específicos, y usted puede tener otros derechos que pueden variar de estado a estado.

En adición a la garantía, las herramientas DeWALT están amparadas por nuestra:

GARANTÍA DE SATISFACCIÓN SIN RIESGO POR 30 DÍAS

Si usted no se encuentra completamente satisfecho con el desempeño de su herramienta industrial DeWALT, sencillamente devuélvala a los vendedores participantes durante los primeros 30 días después de la fecha de compra para que le efectúen un reembolso completo. Por favor regrese la unidad completa, con el transporte pagado. Se puede requerir prueba de compra.

REEMPLAZO DE LAS ETIQUETAS DE ADVERTENCIA GRATUITO: Si sus etiquetas de advertencia se tornan ilegibles o se pierden, llame al 1-800-4-DeWALT para que se las reemplacen sin cost.
